

Transformational Readiness Program For ERP LN Customers

A proper readiness assessment is key for ensuring success in “digital” business transformation.

Program

- Two-day assessment designed to evaluate business processes, tools and technologies
- Establish the benefits that can be achieved by undergoing the transformation
- Provide metrics that could help customers understand the ROI when moving to the Cloud
- Results of the Assessment include:
 - Determination of readiness factors
 - Recommended future digital transformation roadmap

Assessment

- Meet with IT and Executive Management
 - Define objectives of the assessment for specific business areas and processes
 - Analyze the current technology and environment - Baan/LN modules, satellite systems, integrations, extensions, reports, etc.
- Meet with Business Owners of key business areas to identify current pain points
- Determine to what degree the Baan or LN software has been performing against the current business objectives
- Determine future requirements, how the new system is expected to meet new business objectives, and gaps

Additional Workshops

- Review the details of the Assessment findings with the customer and how improvements can be made
- Discuss options for initiating change management, implementation options, and recommendations identified in the Assessment

Assessment Output

- A Report showing the results of the Assessment with recommendations for changes

Benefits

- Analysis of the results of the Assessment with recommendations for improvement
- Identification of potential immediate short-term improvements in the Customer’s operation
- Indication of the readiness of the organization for transformational change
- Knowledge transfer and education from experts in the Infor CloudSuite™, LN, BaaN, software domain with industry specific knowledge

Why Inavista? Business Transformation is a long journey and a continuous learning experience. Inavista has helped numerous customers reach their ERP goals. With extensive expertise in Infor LN, we are here to meet each customer’s specific needs irrespective of where you are in your cloud or on-premise ERP migration journey.

Having completed the most ERP LN implementations across the globe, Inavista brings unmatched experience to take Infor Baan/LN and Cloudsuite customers through the transformation process.

Let’s start a conversation.
